CONFERENCE OF THE PARTIES TO THE  
CONVENTION ON BIOLOGICAL DIVERSITY  
Eleventh meeting  
Hyderabad, India, 8-19 October 2012  
Agenda item 13.11

### DECISION ADOPTED BY THE CONFERENCE OF THE PARTIES TO THE CONVENTION ON BIOLOGICAL DIVERSITY AT ITS ELEVENTH MEETING

#### *XI/30. Incentive measures*

##### *The Conference of the Parties*

1. *Takes note* of the progress reported by Parties and other Governments in implementing decision X/44 on incentive measures, thereby contributing to implementing of the Strategic Plan for Biodiversity 2011-2020, and in particular Aichi Biodiversity Targets 2, 3 and 4, as well as the Strategy for Resource Mobilization;

2. *Notes* existing efforts by a number of Parties to prepare national studies on the economics of ecosystems and biodiversity, and *encourages* other Parties and Governments to also consider, as appropriate, the preparation of such studies, making use of the findings of the international study on The Economics of Ecosystems and Biodiversity (TEEB) and of similar work at the national or regional levels, involving all relevant stakeholders, and to identify mechanisms and measures to integrate the values of biodiversity into relevant national and local policies, programmes and planning processes, as well as reporting systems, in a manner adapted to national circumstances;

3. *Cognizant* of the need to feed the results of these studies into national policy development and implementation in a systematic and coherent manner, *invites* Parties and other Governments that plan to undertake national studies on the economics of ecosystems and biodiversity to ensure that these studies and the revised national biodiversity strategies and action plans are mutually supportive;

4. *Noting* the considerable analytical work that has already been undertaken on harmful incentives by international organizations and initiatives such as the United Nations Environment Programme, the Organisation for Economic Cooperation and Development, the International Union for Conservation of Nature, and the World Trade Organization:

(a) *Invites* Parties and other Governments to develop and apply tools to identify incentives that are harmful for biodiversity, as well as methods to monitor progress towards Aichi Biodiversity Target 3, using the relevant indicator of the strategy for resource mobilization (decision X/3, paragraph 7, indicator 13);

/...

(b) *Emphasizes* that conducting studies for the identification of incentives, including subsidies, harmful for biodiversity need not delay immediate policy action in cases where candidates for elimination, phase out or reform are already known, taking into account national socio-economic conditions;

(c) *Encourages* Parties and *invites* other Governments to take appropriate action in these cases, in the form of elimination or initiation of phase out or reform, taking into account national socio-economic conditions, including by seizing opportunities arising within the review cycles of existing sectoral policies, both at national and regional levels;

(d) *Invites* Parties, other Governments and relevant international organizations to submit to the Executive Secretary information on obstacles encountered in implementing options identified for eliminating, phasing out or reforming incentives that are harmful for biodiversity;

5. *Recognizes* that eliminating, phasing out or reforming incentives, including subsidies, harmful for biodiversity will make positive incentive measures for the conservation and sustainable use of biodiversity more effective and/or less costly;

6. *Invites* Parties and other Governments to take into consideration, in their policy planning, the linkages between the elimination, phase out or reform of harmful incentives, including subsidies, and the promotion of positive incentive measures for the conservation and sustainable use of biodiversity, consistent and in harmony with the Convention and other relevant international obligations, including in revised national biodiversity strategies and action plans, taking into account national socio-economic conditions;

7. *Encourages* Parties and *invites* other Governments to consider, in accordance with the objectives of revised national biodiversity strategies and action plans, inclusion of specific criteria on biodiversity in national procurement plans, national strategies for sustainable consumption and production, and similar planning frameworks, as a contribution to implementing Aichi Biodiversity Target 4 and to strengthening the science base and methodologies to enable this to be done more effectively;

8. *Encourages* Parties to engage the private sector on ways and means to contribute to national implementation of the Convention, such as through the establishment of business and biodiversity platforms/networks and the development of tools to promote the consideration of biodiversity in business activities, including guidance to assist businesses in reporting their environmental impacts, in particular impacts on biodiversity, and to support related international initiatives;

9. *Invites* Parties, other Governments, relevant organizations and initiatives, and bilateral and multilateral funding organizations to develop proposals for extending longer-term technical support and capacity-building on valuation methodologies and the integration of the values of biodiversity into relevant national and local policies, programmes and planning processes, including national biodiversity strategies and action plans, as well as reporting systems, including national accounting, as appropriate;

10. *Notes* the support of international organizations and initiatives, including, among others, the Global Mechanism of the United Nations Convention to Combat Desertification, the United Nations Conference on Trade and Development, the United Nations Development Programme, the United Nations Environment Programme, the World Bank and its Global Partnership for Wealth Accounting and the Valuation of Ecosystem Services, the World Trade Organization, the Organisation for Economic Co-operation and Development, and the International Union for Conservation of Nature, to efforts at the global, regional and national levels in identifying and eliminating, phasing out or reforming incentives that are harmful to biodiversity, in promoting positive incentives for the conservation and sustainable use

of biodiversity, consistent and in harmony with the Convention and other relevant international obligations, and in assessing and mainstreaming the values of biodiversity and associated ecosystem services, and *invites* these and other relevant organizations and initiatives to continue and further intensify this work, including continued support for capacity-building at the national level;

11. *Takes note* of the ongoing work of the United Nations Statistics Commission to include experimental ecosystem accounts in its revised System of Environmental-Economic Accounts, thereby supporting the incorporation of biodiversity, as appropriate, into national accounting, as foreseen by Aichi Biodiversity Target 2;

12. *Requests* the Executive Secretary, with a view to supporting progress towards the achievement of the Aichi Biodiversity Targets, in particular Targets 2, 3 and 4, and to mobilizing resources for biodiversity, to:

(a) Compile the submissions received pursuant to paragraph 4(d), make them available through the clearing-house mechanism of the Convention, and prepare a synthesis report on obstacles encountered in implementing options identified for eliminating, phasing out or reforming incentives that are harmful for biodiversity for consideration by the Subsidiary Body on Scientific, Technical and Technological Advice at a meeting prior to the twelfth meeting of the Conference of the Parties;

(b) Continue and further strengthen its cooperation with relevant organizations and initiatives, with a view to catalysing, supporting and facilitating further work in identifying and eliminating, phasing out or reforming harmful incentives, in promoting positive incentives for the conservation and sustainable use of biodiversity, consistent and in harmony with the Convention and other relevant international obligations, and in assessing and mainstreaming the values of biodiversity and associated ecosystem services;

(c) Continue holding regional capacity-building workshops, in cooperation with relevant organizations and initiatives and, as appropriate, with the participation of relevant experts from finance and planning ministries, to support countries in making use of the findings of the TEEB studies and similar work at national or regional levels and in integrating the values of biodiversity into relevant national and local policies, programmes and planning processes, in a manner adapted to national circumstances, and to support the sharing of pertinent experiences, good practices and lessons learned.
