<b>Comments</b>	
<p>Please provide any general comments on the Appendix 1.</p> <p>Regarding indicator A.0.4, the conclusion is written as " that it would be difficult in the near term". This indicator will be ready for use by the end of 2022, with fully described methodology and verification in at least 7 countries participating in testing it. It is entirely feasible to report on for the next reporting period (e.g. 2024/ 2025). The time needed is reasonable.</p>
