NOTIFICATION

Invited Trainees for the Hands-on Training Course on Rapid Identification of Invasive Alien Species for Achieving Aichi Biodiversity Target 9 in Guelph, Canada

Dear Madam/Sir,

In notification 2015-020, dated 27 February 2015, Parties were notified of 22 candidates selected to participate in the online component of the training course on the application of DNA barcoding in detection and monitoring of priority invasive alien species, pests and zoonotic disease vectors. We are pleased to inform you that the first online component was successfully completed.

As indicated in notification 2014-141, dated 22 December 2014, participants for the second phase hands-on training were to be invited based on their performance in the preliminary online education module. Given the limited space available for the course, the trainees with the top ten scores have been invited for the second component, which will require physical presence at the Biodiversity Institute of Ontario, University of Guelph, Canada. I would like to congratulate all trainees who, through their excellent performance, will be participating in this course.

In this regard, I am pleased to enclose the list of those to participate in the hands on education course on DNA barcoding methodological approaches and technologies. The list was finalized in consultation with the GTI Coordination Mechanism. With the generous support from the Government of Japan, the Secretariat will provide financial assistance to the trainees.

Please accept, Madam/Sir, the assurances of my highest consideration.

Braulio Ferreira de Souza Dias
Executive Secretary

Enclosure

To : CBD National Focal Points, SBSTTA Focal Points, GTI National Focal Points
